At Lytle Red Angus, we focus on producing fertile cows that require minimal inputs. We accomplish this by adhering to a rigorous cull process - highlighted by our refusal to keep cows that test open after being exposed to bulls for 45 days. This ensures that our cows regain condition while raising a calf on summer pasture. We have found that by utilizing a strict breeding season and culling for calving ease, we have developed cows with excellent longevity and reliability. Let our bulls bring some of those long-term genetics to your herd!

All bulls are coming 2-years old.
All bulls are forage developed.
All bulls have tested OSF.
All bulls will pass a semen test.
All bulls will be Trich tested.

LET THE BEST OF OUR HERD COME TO YOURS!

Bulls are available for viewing at
22801 Jensen Road, Wall, SD.
